OBJECTIVE

Cybersecurity professional and military veteran with hands-on experience in incident response, threat detection, and endpoint forensics. Skilled in triaging alerts, performing containment and forensic analysis, creating SOC playbooks, and mentoring junior analysts to improve security posture, seeking a Level 2 SOC Analyst or entry-level DFIR role. I also possess:

- Experience with Microsoft Defender XDR for alert triage, endpoint containment, and threat hunting across Windows and cloud environments.
- Proficient with Avanan, MS Explorer & Mimecast for email security, phishing detection, and DLP monitoring in cloud-hosted applications.
- Utilized Jira for incident tracking, SOC workflow management, and documentation of runbooks, and remediation tasks.
- Experience with live investigations in Bash, PowerShell, SentinelOne, Defender XDR, Elastic/Kibana, Crowded Strike, Devo, Splunk, Google Workspace, Mimecast, & Avanan.

EDUCATION

SANS Technology Institute. (In-Progress)

- Bachelor of Applied Cybersecurity. (96 Credits)

CERTIFICATIONS

- GIAC – Certified Incident Handler (GCIH)
- GIAC - Security Essentials. (GSEC)
- GIAC - Information Security Fundamentals. (GISF)

EXPERIENCE

CyberMaxx (MDR & Incident Response) March 2026 - Present
Level 2 SOC Analyst (Remote)

- Investigated 30–40 security alerts daily across EDR, SIEM, email, and cloud platforms supporting 600+ clients.
- Conducted 1–2 weekly Threat Response Team (TRT) investigations, including advanced incident response and basic forensic analysis.
- Served as an L2 escalation point for complex and sensitive incidents, providing advanced investigation and response support.
- Performed after-action reviews for high-impact incidents, identifying improvements to SOC processes and response procedures.
- Served as an SME for assigned security products, supporting detection tuning, investigation, and response, reducing false positives by up to 11%.
- Acted as a technical point of contact for customers during security incidents, communicating findings and remediation recommendations.
- Trained and mentored L1 & L2 analysts on investigation and response procedures.

JRPC InfoSec (MDR & Incident Response) October 2023 - March 2026
Level 2 Security Analyst (Remote)

- Triageed 250–800 security alerts weekly across EDR, email, and cloud platforms, identifying threats and escalating high-priority incidents.
- Conducted attack surface assessments for 8 clients, identifying exposed assets and vulnerabilities and contributing to 624+ remediations.
- Led containment and remediation for 11 escalated incidents, including endpoint isolation, credential resets, and session revocations.
- Authored and maintained 5+ Microsoft Defender XDR and Avanan response runbooks to improve SOC efficiency.
- Trained and mentored 2 Level 1 analysts on alert triage, investigation, and response procedures.
- Designed and implemented 10+ custom detection rules across EDR, SIEM, and cloud platforms, reducing false positives by 15
